Subject: FW: Draft Final XSEL - Administrator's Emphasis List
[XSEL 12.7.17 draft final 5.03 pm.xlsx](#)
[ATT00001.htm](#)

FYI, the Administrator's Superfund Special Emphasis list is indeed scheduled to be published today. There are now 21 sites, with at least one site in every region. We have 3 sites, as discussed earlier this week: American Cyanamid (Impoundments 1 and 2); Berry's Creek (nominally part of the Ventron/Velsicol site); and the Upper 9 Miles of Lower Passaic River (nominally part of the Diamond Alkali site).
